Facts* not true for our clients:

- 46% of new hires fail within the first 18 months
- Only 19% of new hires achieve 'unequivocal success' within 18 months of hire
- Failures are almost always attitudinal, such as lack of coachability (89%) rather than lack of aptitude (11%)
- *According to Leadership IQ

"Leadership is the art of accomplishing more than the science of management says is possible." Secretary of State Colin Powell

Company Profile

The Nielson Group, founded in 1998, is in the business of creating success at the individual, team and organizational level. We focus on bringing out the best in people and processes for breakthrough performance. We practice the art and science of organizational improvement strategies – designing and delivering best practices within Fortune 500 companies and mid-size industry leaders. We integrate agility and innovation to create business transformation through leading edge human capital management strategies. We value practical, high-impact, proven solutions on the cutting edge of total talent management.

Our Services

At The Nielson Group, we are dedicated to providing you with the best human capital management and business transformation strategies and tools. When we work together you receive clear, consistent, thoughtful guidance and direction that keeps your needs paramount and creates powerful momentum for getting results and achieving goals. For each team or organization, we create fully-customized action plans that encompass your unique needs utilizing powerful talent assessments, experiential learning methods, and tangible coaching.

Human Capital Management Best Practice Solutions

Strategic Talent Assessment & Retention (STAR)

- Make the most of your talent align the right people to the right jobs
- Transform talent acquisition from art to science
- Enhance your bottom line through more effective people management
- Organizational climate, individual talent and job benchmark assessments

Leadership Development

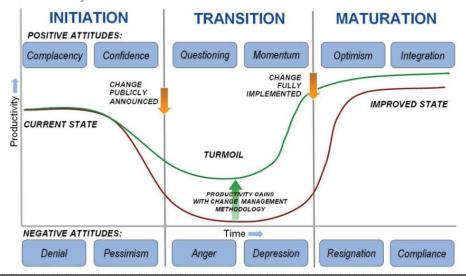

- Leadership Team competencies and collaboration development
- Aligning leadership actions with business transformation goals
- Individualized executive coaching

Business Transformation

Our Business Transformation solutions are designed to quickly and sustainably impact your bottom line results by streamlining your business, teaching critical thinking skills, implementing innovative solutions to problems, and eliminating waste from your processes.

- LSS 4.0TM A breakthrough program that achieves sustainable results, LSS 4.0TM, aligns and integrates Lean and Six Sigma process improvement with "the people side" of team performance. LSS 4.0TM harnesses the enormous potential for human capital effectiveness that is not captured by traditional process improvements alone.
- Business Process Management Systems (BPMS) a time-tested approach to
 actively managing one or several processes, with continuous end-to-end responsibility and
 accountability assigned to process owners. BPMS drives performance and ensures that
 both the customer's and organization's needs are met.
- Innovative Problem Solving™ (IPS) To reach its full potential, your organization must institute world class, value-added processes that reduce or eliminate waste and keep your customers' needs at the forefront. IPS is an action-learning, project specific program that helps your organization achieve these objectives and solve business problems quickly and effectively.

A Complete Assessment Solution

Value Statement

In today's highly competitive marketplace, hiring, developing and retaining top talent is crucial to success. Industry leaders go beyond the traditional resume, interview and yearly review process to use accurate, bias-free assessments to examine individual performance.

Based on a unique, 55-factor analysis, TTI TriMetrix HD® examines the Behaviors individuals bring to the job, the Motivators that drive them, do they possess the Acumen to do the job and their potential to provide the Competencies required by the job. It reveals specific details in four areas that describe the how, why, what and can of superior performance.

As a job benchmarking tool, these four areas define the requirements of each job, providing a complete system to compare talent to the position and achieve the optimum job fit. The comprehensive design of TTI TriMetrix HD ensures that you hire, develop and retain the best possible talent.

Job Benchmarking

If a job could talk, it would explain precisely what was necessary to achieve superior performance. We could ask it to tell us about the:

- $\cdot \text{ Knowledge a person needs} \\$
- · Personal attributes required to drive success
- · Rewards for superior performance
- · Hard skills vital for the job
- · Behaviors necessary to perform at peak levels
- · Intrinsic motivators

But we know a job can't talk, right? We use a patented process that leads to an understanding of the knowledge, intrinsic motivators, personal attributes, behaviors and hard skills required of each key accountability for the job in question.

Applications for the **TriMetrix** go beyond the hiring stage to include new-hire on-boarding, professional development goal setting and planning, managing and motivating strategy, and succession planning.

Assessments for Total Talent Management Life Cycle

- Job Matching
- Talent Selection and Retention
- Aligning Talent Management to Strategic Planning
- Employee Coaching and Development
- Performance Appraisals
- Succession Planning & Organizational Development

Where Opportunity Meets Talent®

Behaviors: The How

Knowledge is the biggest modifier of behavior. Based on the DISC theory, behavior is measured in four dimensions; dominance, influence, steadiness and compliance which are translated into a hierarchy of twelve behavioral traits scored on a 10-point scale. The results enhance the hiring process by revealing how an individual will perform. Behavioral coaching and our Dynamic Communication workshop, based on the DISC model, empower individuals to take action towards professional growth.

Motivators: The Why

As a window through which we view the world, motivators are the drivers of our behavior. or what motivates our actions. Motivators are measured in six areas: theoretical, utilitarian, aesthetic, social, individualistic and traditional. With the knowledge of motivators, you can encourage employees in a way that satisfies their inner drive right from the start. The results will benefit both hiring and coaching initiatives by revealing why an individual acts the way they do, or what motivates their behavior.

Acumen Indicator: The Can

Unique in it's ability to assess how astutely a person analyzes and interprets their experiences. A person's acumen, or keenness and depth of perception or discernment, is directly related to their level of performance. The stronger a person's acumen, the more aware they are of their reality in both their external and internal world. The report will give insight into the thought processes that affect performance, describing their potential for superior performance.

Competencies: The What

The TTI TriMetrix HD Report describes an individual's strengths in 25 researchbased capacities, or personal skills, that are directly related to the business environment. Through the assessment of an individual's own personal skills, this quantitative measurement tool analyzes each capacity on three levels: mastery, some mastery and no mastery. The top skills outlined in the report highlight individuals' well developed capabilities and reveal the areas where they are most effective. When used as a benchmarking tool, this component helps ensure the inherent skills of each individual match the personal skills required by the job.

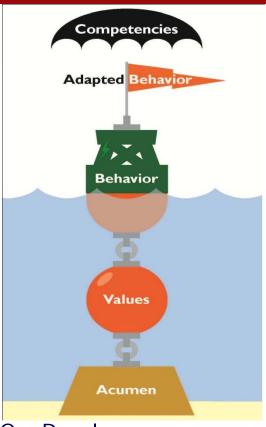

Acumen indicators show potential a person can access for job performance.

Behavioral traits show how a person will get the job done.

Intrinsic motivators reveal why a person is motivated to perform on the job.

Skill Competencies are what competencies a person has demonstrated in prior work.

Our People

Knowledgeable, Collaborative, Committed
